

Test Fixtures & Safety Enclosures

Innovation + Engineering = Solutions

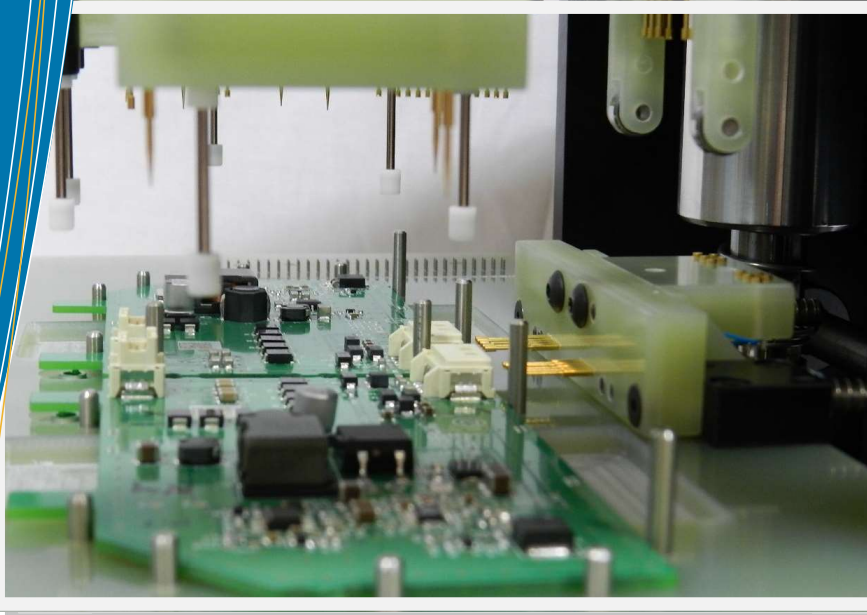

Technology at work for you

Cortek Test Solutions is a pioneer in applying the reusability and modularity concept to the design of test fixtures for electronics products. CTS products have an advantage because they are truly modular, adaptable and scalable in size to accommodate the customer's application when standard sizes won't meet the requirement. This makes the job of both design and test engineers easier. Cortek's solutions are cost effective because the units can be re-tooled and reused. This sets us apart from the competition.

Custom solutions for your testing

Cortek Test Solutions has proven itself to be a reliable partner for many OEM's and ATE Integrators. CTS has gained recognition as a market innovator in the design, development and manufacture of custom and off-the-shelf test fixtures and safety enclosures.

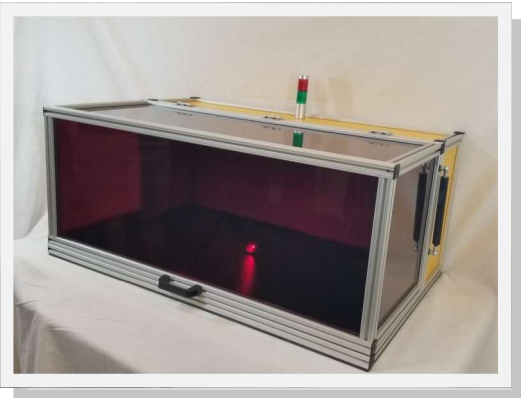

Cortek's design capabilities range from very basic to extremely sophisticated solutions. Developing custom test fixtures demands more engineering time as well as an in-depth knowledge of mechanical design and pcb test methods paired with precision machining. Our experienced engineers will evaluate your requirement and design innovative mechanical test fixtures to meet your application needs.

SOLUTIONS AND SERVICES

- CUSTOM TEST FIXTURES
- OFF-THE-SHELF TEST FIXTURE KITS
- HIPOT SAFETY ENCLOSURES
- FIXTURE PROBES AND HARDWARE.
- MECHANICAL ENGINEERING SERVICES
- DESIGN FOR TESTABILITY ANALYSIS
- MACHINING SERVICES
- DRILLING AND ROUTING
- ASSEMBLY AND WIRING
- BUILD TO PRINT

OUR OFF THE SHELF PRODUCTS ALONG WITH CUSTOM FUNCTIONAL FIXTURES ARE DESIGNED FOR RUGGED USAGE IN BOTH R & D AND PRODUCTION ENVIRONMENTS

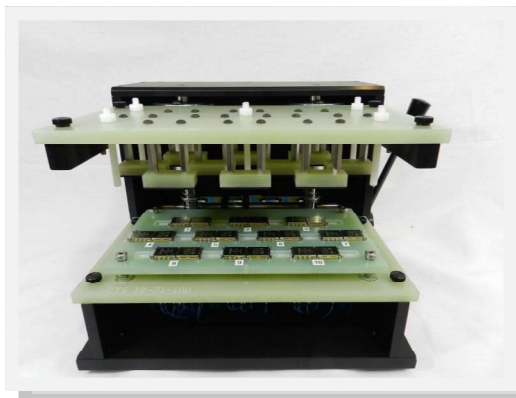

Custom Size Safety Enclosure with Red UV panels

Z-Axis Mechanical Test Kit with custom programming and functional test fixture.

Flip Top Mechanical Press for testing fine pitch contacts PCB.

1012 Reusable Mechanical Press testing 10 non-panelized UUTs simultaneously.
